LETTER OF TRANSMITTAL

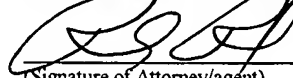

The enclosed Divisional Patent Application is believed to be an exact copy, as filed, of presently copending patent application serial number 09/812,201, filed March 16, 2001, entitled "Tripod Stabilizer and Lighted Lens Carousel", by the same inventor David Harold Coleman, and which was assigned to group 3632 and to Examiner Alfred Wujciak, and which is presently approved for issuance as a patent. This filing is prior to the payment of the Issue Fee of the above identified parent patent application. This Divisional is filed under 37 USC 1.53 (b) (1) and 1.63 (d), and claims the priority of the parent patent application. No new matter is added.

A set of the informal drawings, as was filed, as well as a copy of the Declaration and Power of Attorney and Small Entity Statement pages that were filed with the parent application is attached hereto. A set of formal drawings is also enclosed, and it is requested that the enclosed formal drawings be used to replace the informal drawings.

A "Preliminary Amendment" which cancels claims 1-15 that were originally filed with the above identified parent application is attached. Claims 16-19, as originally filed in the parent application, are currently amended. New claims 20-23 and 29 are currently added. The newly added claim numbers are identical to claim numbers occurring in the parent application prior to the submission of the last amendment affecting the parent application and

subsequently resulting in a notice of allowance. Therefore, remaining claims 16-23 and 29 are those requested for consideration regarding this Divisional Application. The attached Preliminary Amendment requests that these remaining claims be renumbered as 1-8 and 9 respectively. The calculated filing fee is based on the claims in this Divisional Application that are remaining for consideration (16-23, 29) after the Preliminary Amendment has been affected.

Respectfully submitted,
